

# GOURUGOLLA ROHITH

+91 9347140077 | [gourugollarohith24@gmail.com](mailto:gourugollarohith24@gmail.com) | <https://www.linkedin.com/in/gourugolla-rohith-512226210/>

## Summary

---

Results-driven Power BI Developer with hands-on experience in designing, developing, and deploying interactive dashboards, reports, and business intelligence solutions using Power BI Desktop and Power BI Service. Skilled in data modelling, DAX calculations, Power Query transformations, SQL development, UTC queries and KPI reporting. Experienced in building optimized semantic models, integrating data from multiple sources, automating workflows using Power Automate, and delivering business insights for enterprise reporting needs. Strong understanding of data validation, report performance optimization, row-level security, Agile methodologies, and stakeholder collaboration.

## Technical Skills

---

- **BI & Visualization:** Power BI Desktop, Power BI Service, Tableau, Tabular Editor.
- **Data Modelling:** Star Schema, Snowflake Schema, Semantic Models, Dataset Optimization.
- **Languages & Tools:** SQL, DAX, Power Query (M), Python, Jupyter, Advanced Excel VBA
- **Databases:** SQL Server, Postgre SQL
- **ETL & Automation:** Power Query, Data Transformation, Power Automate
- **Cloud & Platforms:** Microsoft Fabric.
- **Analytics:** KPI and Dashboard development, DAX Optimization, Data Validation,
- **Methodologies:** Agile, Sprint Planning, Stakeholder Reporting.

## Projects

---

### Gen AI Dashboard | Learning and Development Analytics | Jan 2026 - June 2026

- Designed and developed interactive Power BI dashboards to track Cognizant associates' AI up skilling journey from beginner to AI Builder levels.
- Created optimized DAX measures, KPIs, and 14 metrics each loading time of 30 Secs to 12 Secs.
- Improved report performance and reduced dashboard load time to under 10 seconds through model optimization and efficient DAX calculations.
- Built reusable semantic datasets and interactive visualizations for stakeholder reporting and analytical insights.

### ALADIN Dashboard | Learning and Development Analytics | Jan 2024- Dec 2025

- Developed enterprise-level Power BI reports to monitor learning progress and license utilization for associates up to director grade and Reporting for 94 Stakeholders.
- Designed intuitive UI/UX dashboards by consolidating 5 reports into a single optimized reporting solution with RLS.
- Built data transformation workflows using Power Query and automated refresh/reporting processes using Power Automate and created Microsoft Subscriptions for dashboards and reducing daily manual efforts by 3 hours.
- Improved reporting efficiency by saving approximately 1350 hours annually with single interactive report using 45 global filters on 25 pages

### One Transport Dashboard | Financial Analytics | Cognizant | Mar 2022- Dec 2023

- Developed Power BI dashboards to monitor transport utilization, trips, Pru analytics, and billing operations of Cognizant members and customers.
- Wrote UTC SQL queries for 65 pages of report includes joins CTE's and window functions for validation to ensure reporting accuracy.
- Performed DAX validation and data quality checks for dashboard measures and KPIs.
- Automated invoice reporting workflows using Power Automate mailers for operational efficiency.

## Professional Experience

---

### Senior Power BI Developer (Associate)

- Designed, developed, tested, and deployed Power BI dashboards and reports for enterprise reporting solutions.
- Built robust data models, DAX measures, KPI's and Power Query transformations for analytical reporting and data story telling.
- Performed SQL-based unit testing, data validation, and report performance optimization.
- Managed Power BI Service workspaces, refresh schedules, and stakeholder reporting requirements.
- Collaborated with business stakeholders and support SMEs to translate reporting requirements into technical solutions.
- Implemented workflow automation using Power Automate to streamline reporting operations.
- Followed Agile methodology with sprint-based development and delivery cycles.
- Provided Knowledge Transfer sessions and trainings, mentored peers and team members on BI development practices.

## Certifications

---

- Microsoft Certified: Power BI Data Analyst Associate (PL-300).
- Microsoft Certified: Fabric Analytics Engineer Associate (DP-600).

## Education

---

### Bachelor of Technology in Electronics and Communications (2017-2021)

- Chadalawada Ramanamma Engineering College with CGPA of 9.3
- Developed Real time bus tracking for college using.
- Active participant in technical paper presentations and ScienceFair.
